Expecting Something Better for U.S. Consumers

If Only IT Could Save Health Care

In the Wall Street Journal's special section on Business Insight, Amar Gupta, University of Arizona professor of entrepreneurship and IT, weighs in how information technology will change health care in the coming years. It sounds wonderful but I can't help but thinking that health care bureaucracy will slow all these down.

Wall Street Journal: [Prescription for Change](#), 2008-Oct-20, by Amar Gupta

What follows is a look at four major ways in which IT will revolutionize health care:

- more offshore services,
- integration of health-information systems,
- drug-safety monitoring on a global scale, and
- more high-quality information to doctors and patients.
